The radio meteorologist has just concluded his hourly report. Another night of minus 18-degree weather with a 40 kilometer per hour wind is on the way. It seems never ending.

The dead of winter. That's what they call it. It seems an appropriate name. A glance out of the window confirms that only the tree branches are moving in response to a howling wind this weekend. Nothing else appears to be mobile. All intelligent life is indoors.

The dog – very reluctantly – is standing by the door. He must go out to "do his business". He seems to glance enviously at the litter box of his feline friend. Cats are always somewhat arrogant creatures, but as the dog waits to go outside, the cat appears to wear an expression of particularly smug self-satisfaction. All have begun to develop an understanding of the term "cabin fever".

But there is hope. In less than sixty days we will be into April. The riding season will be just dawning.

In an effort to carry us through to this glorious time, the Kickstand presents a photomontage of the riding season just passed. It was a very good year, and – all being well – the upcoming year has the potential to be even better.

We look forward with anticipation.

The (Interim) Editor

Bruce in his natural habitat.

With all of our best wishes for many happy returns

The planners and plotters

With thanks to Kevin for all of his hard work in making our show display possible
